

## Mobile Flat-Panel Floor Stand - 37" to 70" TVs and Monitors

MODEL NUMBER: **DMCS3770L**

Mobile TV floor stand lets you roll a mounted flat-panel display and its components from room to room on metal casters.

### Features

#### Move Your Flat-Panel Display and Components Wherever You Want Them

The DMCS3770L Mobile Flat-Panel Floor Stand allows you to install a flat-panel television or monitor and its components (Blu-ray player, laptop, webcam, DVR), and then roll them safely and smoothly from room to room or from one corner of the room to another. The rolling TV stand is recommended for classrooms, lecture halls, offices, auditoriums, conference rooms and other settings where you need your audio/video equipment to be mobile.

#### Designed to Match a Wide Variety of Applications

The height-adjustable mobile TV floor stand fits most LCD, plasma and other flat-panel displays from 37 to 70 inches. Its durable aluminum and steel frame supports up to 88 pounds. You can raise or lower the height of the display from 52.5 to 67.5 inches above the floor, and adjust the display to an appropriate viewing angle from -10° to +10°.

#### Rolls Easily from Place to Place on Sturdy Metal Casters

The TV stand with wheels rolls almost effortlessly to the proper viewing location and angle on sturdy four-inch swivel casters with rubber wheels that move smoothly in any direction through doorways and over thresholds. The rear casters lock to keep the stand securely in position while at rest. Equipment cables route through the stand's telescoping poles to keep them organized and out of the way during transport.

#### Convenient Shelf Holds Components in Place

A height-adjustable shelf mounted below the display holds various audio/video components, such as a Blu-ray player, laptop, webcam, cable box, DVR or video game system. The shelf measures 29 x 49 centimeters and supports up to 22 pounds.

#### Complies with VESA Standards

VESA (Video Electronics Standards Association) promotes uniformity in the video electronics industry by developing industry-wide standards for products like flat-panel TVs and monitors. To comply with these standards, most manufacturers use a series of universal mounting hole patterns, measured in millimeters, on the backs of the products. Measure the vertical and horizontal distances between the holes on the back of your display or refer to your display's owner's manual to find its VESA pattern. The DMCS3770L conforms to VESA-compliant displays with any of the following standard mounting hole patterns: 200 x 200, 300 x 300, 400 x 200, 400 x 400 and 600 x 400.

### Highlights

- Accepts most popular flat-panel displays from 37 to 70 in.
- Moves easily through doorways and over thresholds on durable metal casters
- Display adjusts in height from 52.5 to 67.5 in. for most comfortable viewing angle
- Adjustable shelf holds Blu-ray player, webcam and other necessary components
- Sturdy aluminum and steel construction built to withstand frequent movement

### Applications

- Mount a large flat-screen television and Blu-ray player for showing promotional videos at trade shows
- Roll a TV/Blu-ray player combo from classroom to classroom for sharing educational videos with students
- Attach a webcam to a flat-screen monitor for teleconferencing in corporate boardrooms

### Package Includes

- Left leg
- Right leg
- Left cover
- Right cover
- Middle base
- (2) Front casters
- (2) Locking rear casters
- (2) Telescoping poles
