FUJITSU PRIMERGY LTO-6 HH Ultrium Backup Tape Device

Backup and archive solution

Have you ever lost data from your computer for some unfathomable reason? Then you will know that data saved on your hard disk is not always available and secure for all times. If you want to be on the safe side, then you should save your data regularly using an external medium. The PRIMERGY backup solutions provide reliable protection against losing data and a fast data backup combined with a large amount of storage capacity. You can choose between backup technologies, such as DDS and LTO tape drives or RDX from the latest Removable Disk technology. Each company can thus find the perfect data backup solution for its particular requirements. Downwards compatibility with the respective predecessors is sensible not only regarding upgrades for the future but also as a secure investment. The half-height of the current models enables you to install the drives directly into the servers and thus save space and money.

PRIMERGY LTO-6 HH Ultrium

For the first time, the sixth generation of the Linear Tape Open (LTO-6) tape drive offers uncompressed storage capacity of 2.5 TB per tape and a transfer rate of up to 160 MB/s. With enabled compression up to 6250 GB can be backed up on a single drive with up to 400 MB/s transfer rate. The advantage is that the LTO-6

drive guarantees the protection of your investment by ensuring full compatibility to LTO-5 media. Furthermore, the reading of LTO-4 media is supported. In addition, the LTO-6 tape drive continuously support media partitioning, encryption of data and WORM media. All the improvements make the LTO-6 tape drive suited for handling backup, restore, and archive of higher data capacities at higher data transfer rates as compared with the previous LTO-5 tape drive. The industry standard SAS interface ensures ease of installation and integration in your server or data center. With its high storage capacity and transfer rate the LTO-6 offers a trend-setting safeguard for your server systems.

Main Features	Benefits
<ul style="list-style-type: none">■ Compact size as well as high transfer rates of up to 160 MB/s.■ Energy efficient design■ Investment protection■ AES-GCM-256-Bit encryption	<ul style="list-style-type: none">■ Fastest and smallest (half height) LTO drive for integration in all servers.■ Low power consumption and cooling costs plus excellent performance■ Read/write compatibility with LTO-5 media as well as read compatibility with LTO-4 media■ Ensures that data can still be deciphered after a few years.

Technical details

Backup and archiving solutions

Capacity	2500 GB uncompressed / 6250 GB compressed
Buffer size	512 MB
Transfer rate	160 MB/s (uncompressed), 400 MB/s (compressed), Variable 47 to 140 MB/s (LTO5 uncompressed)
Recording format	Ultrium LTO6
Interface	SAS 6Gb/s
Data transfer rate (burst)	400 MB/s
Device load / unload cycles	80000
Cartridge load / unload cycles	100000
Backwards compatible	Read/write compatibility with LTO-5 Read compatible with LTO-4
Data compression	ALDC

Security

Data encryption	AES-GCM 256
Certification level	FIPS140-2 certification level 1

Reliability

MTBF	250,000 hours
Hard Read Error Rate	1×10^{-17}
