

DL3™ FE FIPS Edition

Dual 2-Pass Encryption – The Ultimate in Security Made Simple

Building on the success and design of our award winning DataLocker DL3, the DataLocker DL3 FE (FIPS Edition) provides unmatched usability and security. Utilizing the sleek design and portable form factor of its predecessor, the DL3 FIPS Edition pairs blazing USB 3.0 speeds and two independent crypto processors.

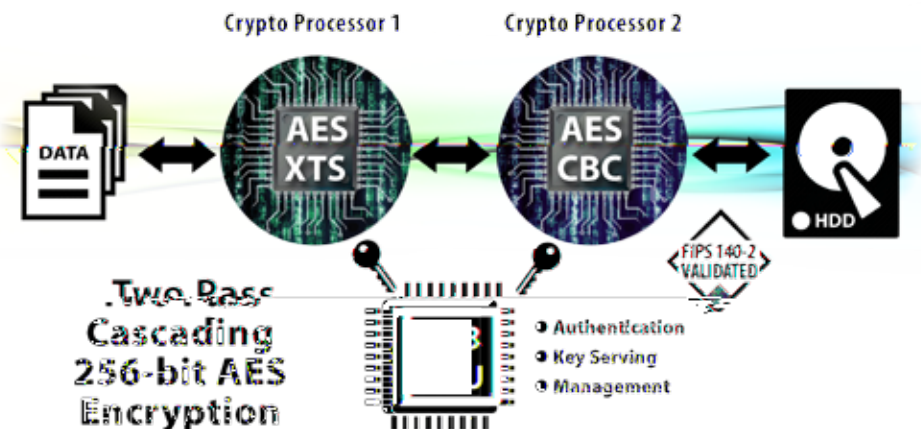

Our patented design, featuring a back-

lit touchscreen with an alphanumeric rotating keypad, allows for strong passwords and absolute security.

For additional peace of mind, next generation features include the DataLocker Link which pairs your drive to a particular set of computers – enabling you to control which computers can access your drive. Optional 2-Factor

authentication utilizes a RFID tag in addition to your password for added protection.

Military Grade Encryption. Absolute Convenience. Together in the palm of your hand.

About DataLocker

DataLocker is an innovative provider of encryption solutions. DataLocker products secure systems, media, external storage and cloud services for governments, military and enterprises around the world. Headquartered in Overland Park, Kansas, DataLocker devices combine superior convenience and usability with state of the art security. DataLocker is "Simply Secure." Rotating Keypad
(To Prevent Surface Analysis)

Alpha Numeric Keypad
(For Strong Passwords)

No Software or Drivers
Mac, Linux and Windows Compatible

Auto-Lock Feature
(Automatically times out the device when idle)

Read-Only Feature
(Restricts users from overwriting or altering contents of the drive)

Compatible with DL Configurator to manage multiple devices

* Screens Simulated

Features

- Hardware based encryption - dedicated dual 256-bit AES crypto engines in XTS and CBC modes
- Two factor authentication via RFID card (optional)
- All encryption, administration and authentication performed on the DataLocker unit
- Rapid key zeroization for secure redeployment
- Self-Destruct mode for protection against brute force attacks
- Auto-Lock mode to automatically timeout the device after a customizable number of minutes
- Patented touch-screen display and user-friendly interface
- Rotating keypad for mitigation of surface analysis and shoulder surfing
- Virtual CD feature to mount an ISO disc image. The virtual drive will behave just like a physical CD/DVD drive.
- Supports two roles: Administrator to set policy, read-only mode, and recover data and User to access data
- Strong Password Rule (Non Sequential, Repeating, Alpha + Num, Min 8 characters)
- Multi-Lingual User Interface (English, French, German and Spanish)

Technical Specs

- Capacities:** 500GB, 1TB, 1.5TB, 128GB SSD, 256GB SSD, 512GB SSD & 960GB SSD
- Interface:** USB 3.0 and backwards 2.0 Compatible
- Standards and Certifications:** TAA Compliant, RoHS Compliant, FCC and CE, Manufactured according to ISO 9001:2000
- Cryptographic Processes:** FIPS 197 (Cert. #250) & FIPS 140-2 Validated Crypto Chip (Cert. #1472)
- Dimensions:** 120mm x 80mm x 23mm (L x W x D)
- Weight:** Approximately 9 oz.
- System Compatibility:** Compatible with Windows, Mac, and Linux
