

### Overview

#### HP MSA 2040 Storage

HP MSA 2040, a high-performance storage array designed for entry-level HP customers desiring 8Gb/16Gb Fibre Channel, 1GbE/10GbE iSCSI, or 6Gb/12Gb SAS connectivity with 4 host ports per controller. The MSA 2040 Storage array provides an excellent value for customers needing performance balanced with price to support initiatives such as consolidation and virtualization.

The MSA 2040 delivers this performance by offering:

- High performance controller architecture
- 4GB cache per controller
- Four host ports per controller
- Support for SSDs, Enterprise SAS HDDs, Midline SAS HDDs, and Self Encrypting Drives
- SAN and SAS interfaces
- Up to four (4) host ports per controller
- Two new MSA 2040 Controllers:
  - MSA 2040 SAN Controller
    - 8Gb/16Gb FC connectivity and/or
    - 1GbE/10GbE iSCSI connectivity
  - MSA 2040 SAS Controller
    - 6Gb/12Gb SAS connectivity<sup>1</sup>

The HP MSA 2040 Storage ships standard with a license for 64 snapshots for increased data protection. There is also an optional license for 512 snapshots. The HP MSA 2040 can also replicate data between arrays (P2000 G3, MSA 1040 SAN and/or MSA 2040 SAN Model only using FC or iSCSI protocol) with the optional Remote Snap feature (only available on linear storage).

---

#### What's New in the MSA 2040 array family

- Introducing support for 12G Large Form Factor and Small Form Factor Hard Disk Drives
  - HP MSA 1.8TB 12G SAS 10K SFF (2.5in) 512e Enterprise 3yr Warranty Hard Drive
  - HP MSA 1TB 12G SAS 7.2K SFF (2.5in) 512e Midline 1yr Warranty Hard Drive
  - HP MSA 2TB 12G SAS 7.2K SFF (2.5in) 512e Midline 1yr Warranty Hard Drive
  - HP MSA 8TB 12G SAS 7.2K LFF (3.5in) 512e Midline 1yr Warranty Hard Drive

---

<sup>1</sup> MSA 2040 SAS controllers require mini-SAS HD cables

### Overview

### Features

#### HP MSA 2040 Carrier-Grade Components (NEBS)

The HP MSA 2040 Storage arrays (SAN or SAS Controllers) connected 2U storage area network (SAN) or direct connect solution designed for network equipment providers (NEPs) and communication service providers. Suited for those who need a robust telecom infrastructure.

The HP MSA 2040 Carrier-Grade Chassis (C8R11A) is a controller-less 6Gb chassis capable of supporting one or two MSA 2040 SAN Controller (C8R09A) or MSA 2040 SAS Controller (C8S53A) and has twenty-four Small Form Factor (SFF) drive bays. It comes equipped with two DC-power power supplies.

The HP P2000 2.5-in Dual I/O JBOD (BV921B) is a special model disk enclosure designed for use with NEBS compliant MSA 2040 configurations. This drive enclosure has 24 drive bays (unlike the D2700 with 25 drive bays) and has dual DC-power supplies. It is only sold with a carrier grade arrays.

The NEBS compliant MSA 2040 supports configurations with up to 7 compliant disk enclosures for a maximum of 192 SFF HDD 's.

When used in conjunction with specific Storage SFF SAS drives, the solution is NEBS certified (GR-63 and GR-1089) and Seismic Zone 4 rated. NEBS level-3 certification provides the assurance that the equipment is safe to operate and sturdy enough to withstand certain physical and environmental (for example, fire, earthquakes) conditions. For Seismic Zone 4 rating, the MSA 2040 must be mounted in an HP Seismic Rack (AH335A).

### All MSA 2040 models offer a common set of valuable features:

- MSA 2040 controller architecture which maximizes performance
  - Four host ports per controller  
 MSA 2040 SAN controller supports 8Gb FC, 16Gb FC, 1GbE iSCSI or 10GbE iSCSI SFPs.  
 MSA 2040 SAS controller supports 6Gb and 12Gb SAS host connectivity using mini-SAS HD Cables.
  - 4 GB transportable read/write cache per controller.
  - Battery-free cache backup with super capacitors and compact flash
- MSA 2040 SAN Controller allows customers to create their own Combo Controller by mixing FC and iSCSI SFPs. Below are the valid configurations for mixing SFPs:

Configuration Table for mixing SFPs

Configuration	Controller	Host Port 1 SFP <sup>1</sup>	Host Port 2 SFP <sup>1</sup>	Host Port 3 SFP <sup>2</sup>	Host Port 4 SFP <sup>2</sup>
Table for mixing SFPs	Controller A	16Gb FC	16Gb FC	None	None
				16Gb FC	16Gb FC
				8Gb FC	8Gb FC
				10GbE iSCSI	10GbE iSCSI
				1GbE iSCSI	1GbE iSCSI
		8Gb FC	8Gb FC	None	None
				16Gb FC	16Gb FC
				8Gb FC	8Gb FC

<sup>1</sup> SFP in Host Port 1 must match SFP in Host Port 2

<sup>2</sup>SFP in Host Port 3 must match SFP in Host Port 4

### Features

#### All MSA 2040 models offer a common set of valuable features:

(**NOTE:** Customers must upgrade their MSA 2040 controller firmware to GL101 or later for iSCSI functionality  
Customers must upgrade their MSA 2040 controller firmware to GL105 or later for Self-Encrypting Drive functionality  
Customers must upgrade their MSA 2040 controller firmware to GL200 or later for MSA virtualizations features)

- MSA 2040 supports SSD drives which allow IT managers to boost IOPS performance.
- Automated Sub-Lun Tiering. The MSA 2040 can manage up to three tiers of storage: Performance tier, Standard tier and Archive tier. This feature is available with GL200 firmware or newer and the Performance tier requires a license.
- SSD Read Cache to improve random read performance.
- MSA 2040 supports Self-Encrypting Drives (SED) to allow customers to secure their critical data and comply with all required regulatory mandates.
- Simple storage management including an intuitive browser-based user interface.
- Storage Management Utility V3 (SMU). This new MSA management GUI brings a new modern look and feel to array management. SMU V3 available with GL200 firmware or newer. Existing MSA customers can choose to use the new SMU V3 or to continue to use the previous generation SMU V2 if new virtualization features are not required.
- Thin Provisioning allows storage allocation of physical storage resources only once they are consumed by an application. Thin Provisioning also allows over-provisioning of physical storage pool resources allowing ease of growth for volumes without predicting storage capacity upfront. Thin Provisioning is available with GL200 firmware or newer.
- MSA 2040 comes standard with 64 controller-based snapshots and clone capability (volume copy is only available on linear storage). Arrays also support an optional 512 snaps. Choose either a low-cost single controller array or start with a configured dual controller array model to fit the budget, high availability, and performance needs.
- All models feature a wide variety of drives: High-performance SSD drives, enterprise-class SAS, SED and SAS Midline drives.
- The MSA 2040 will support a maximum of 7 disk enclosures (either LFF and/or SFF). Add-on enclosures can either be D2700 Small Form Factor (SFF) drive enclosures or MSA 2040 Large Form Factor (LFF) disk enclosures. The array can grow incrementally from a few drives to 96 LFF or 199 SFF drives.
- Disks Groups can be spanned across multiple enclosures RAID levels 1, 5, 6, 10. Linear Vdisks support RAID levels 0, 1, 3, 5, 6, 10, 50.
- Maximum hard drive counts vary by RAID levels: 2 drive max for RAID level 1; max of 16 drives for RAID levels 0, 3, 5, 6, and 10; max of 32 drives for RAID level 50. With GL200 or newer firmware multiple Disk Groups can be aggregated into a Storage Pool.
- The maximum LUN size is 128TB
- Storage Pools allow data on a given LUN to span across all drives in a pool. When capacity is added to a system, the user is also getting a performance benefit of the additional spindles –hence the term Wide Striping. Storage Pools are available with GL200 firmware or newer.
- Snapshot enhancements for virtual storage, including performance improvements, hierarchical snapshots, and simplified resource management.
- Non-disruptive on-line controller code upgrade (requires dual controllers w/ multi-pathing software)
- Upgradable by design. Owners of an MSA P2000 G3 and an MSA 1040 array are able to do data-in-place controller upgrades to the new MSA 2040 array. This unique ability protects the earlier investments in drives, and JBODs.  
(**NOTE:** Certain limitations are applicable- please review [MSA2040 Upgrade Technical Whitepaper](http://www8.hp.com/h20195/v2/GetDocument.aspx?docname=4AA4-6830ENW) (<http://www8.hp.com/h20195/v2/GetDocument.aspx?docname=4AA4-6830ENW>) before upgrading your P2000 G3/MSA 1040 systems)

### Features

#### Application Solutions

The HP MSA 2040 Storage is the ideal solution for customers running Oracle, Microsoft, SAP environments and those customers who are deploying virtual server technologies like VMware and Hyper-V. The MSA 2040 delivers enterprise functionality that enhances virtual environments, simplifies management, and reduces costs. Easy to deploy, scale and maintain, HP MSA 2040 Arrays ensure that crucial business data remains available.

HP has developed best-in-class expertise in Oracle, Microsoft, SAP, and Virtualization Hypervisor technology through extensive testing with the HP MSA 2040, HP servers, and management software; high availability and disaster recovery solutions; and backup and recovery on the Oracle, Microsoft, and SAP application platforms. As a result, our customers can expect a wide range of operational and business benefits where they can:

- Deploy IT assets across multiple locations.
- Incrementally grow storage without interruption.
- Enable high availability and disaster recovery capabilities for critical applications.
- Deploy a remote disaster recovery site.

### Family Information

	MSA 2040
<b>Capacity</b> Single Enclosure and Maximum Additional Drive Enclosures	<b>LFF:</b>  96 TB (single LFF array-head -using 12 x 8TB LFF SAS MDL drives) 768 TB (by adding 7 LFF Disk Enclosures behind LFF Array & using 8TB LFF SAS MDL drives)  <b>SFF:</b> 43 TB (single SFF array-head - using 24 x 1.8TB SFF SAS drives) 358 TB (by adding 7 SFF Disk Enclosures behind SFF Array & using 1.8TB SFF SAS drives) <b>NOTE:</b> maximum available storage capacity depends on the RAID level being implemented
<b>Controller Cache</b>	4 GB per controller
<b>Total LUNs</b> (LUN size are dependent of the storage architecture: Linear vs. Virtualized)	512 maximum LUN size: 128TB Thin Provisioning allows you to create the LUNs independent of the physical storage
<b>Host Interconnect</b>	MSA 2040 SAN controller will support up to four connections with options of 16Gb, 8Gb FC and 10GbE, 1GbE iSCSI per controller. See table above for valid configuration table. MSA 2040 SAS controller will support up to four 6Gb/12Gb SAS connections per controller using mini-SAS HD cables
<b>Maximum Drives</b> w/ expansion	96 LFF/199 SFF
<b>Maximum host supported</b>	64 in v2 UI 512 in v3 UI
<b>Standard Software:</b>	Snapshot, 64 (snaps)
<b>Optional Software</b>	Remote Snap (linear storage only) Max Snapshot (512) Performance Tiering

### Product Technology

<b>MSA 2040 SAN controller</b>	MSA 2040 SAN controller supports 8Gb FC, 16Gb FC, 1GbE iSCSI or 10GbE iSCSI SFPs.
<b>MSA 2040 SAS controller</b>	MSA 2040 SAS controller supports 6Gb and 12Gb SAS host connectivity using mini-SAS HD cables.
<b>Modular Chassis</b>	2U rack height. 12 Large Form Factor or 24 Small Form Factor drive bays, accommodating SSD (available only for Small Form Factor), SAS, SEDs and SAS Midline drives. Comes with space for one or two controllers
<b>Drives available</b>	The MSA 2040 controllers support both the MSA 3.5-inch Large Form Factor (LFF) drives, and the MSA 2.5-inch Small Form Factor (SFF) drives. <ul style="list-style-type: none"> <li>• Solid State Drives (SSDs) deliver exceptional performance for applications requiring high random read IOPs performance (available only for Small Form Factor).</li> <li>• Serial Attached SCSI (SAS) enterprise-class drives are designed for high demand, 24x7 usage.</li> <li>• SAS Midline drives are usually reserved for archival of data as they are relatively inexpensive and are available in very large capacities.</li> </ul>

### Family Information

- Self-Encrypting Drives (SEDs) are designed to safeguard critical personal and business information and to comply with Regulatory Mandates

### Optional Disk Enclosures

Just as the user has a choice of chassis for the array head (LFF and SFF drive bays, AC or DC powered), so also do they have a choice of expansion disk enclosures accommodating either drive size. Both the MSA 2040 and the D2700 disk enclosures can be hot-added to an operating array. SFF and LFF Array heads and Disk Enclosures can be mixed without limitations.

**MSA 2040 3.5-inch Disk Enclosure.** This 2U unit has twelve LFF (3.5-inch) drive bays and accepts for MSA dual-ported SAS, SEDs and SAS MDL drives. The pre-configured HP MSA 2040 LFF Drive Enclosure (C8R18A) has two I/O modules and supports both single and dual controller arrays.

- This 3.5-inch MSA disk enclosure can be attached to MSA 2040 LFF or SFF array head.
- Each configured model ships standard with two .5m mini-SAS to mini-SAS cables for connection to the MSA 2040 array expansion port or existing disk enclosure cascade port.
- LFF and/or SFF Disk Enclosures can be mixed up to the maximum of 7 total Disk Enclosures
- The MSA 2040 does not support LFF SATA HDDs.

**D2700 2.5-inch Disk Enclosure.** This 2U storage enclosure (AJ941A) is designed to support twenty five HP Storage or ProLiant 2.5-inch Universal form factor (SFF) 12Gb, SSD, SAS, SEDs or SAS MDL hard drives. It ships standard with dual I/O modules installed.

- This 2.5-inch D2700 disk enclosure can be attached to MSA 2040 LFF or SFF array head
- The D2700 enclosure ships with a two .5m mini-SAS to mini-SAS cables for connection to the MSA 2040 array expansion port or existing disk enclosure cascade port.
- LFF and/or SFF Disk Enclosures can be mixed up to the maximum of 7 total Disk Enclosures.
- The MSA 2040 does not support SFF SATA HDDs.

### Scalability

The MSA 2040 array configurations are designed to allow an installation to begin with smaller capacity and be able to grow gradually as needed. The flexibility of SSD, SAS or SAS MDL drives technology, form factors, sizes, speeds, and costs per GB allows a system to easily fit in almost any budget.

- Large Form Factor configurations can scale up to 72 TB SAS MDL, expandable to 576 TB SAS MDL with the addition of a maximum of seven MSA 2040 3.5-inch Disk Enclosures.
- Small Form Factor configurations can scale from 28.8 TB SAS. With the addition of seven D2700 JBODs, the MSA 2040 storage can support 238TB SAS.
- Users may configure a 24-drive MSA 2040 array head with 12-drive LFF MSA 2040 3.5-inch disk enclosures. This is an excellent option for a configuration that supports high-speed SFF SSDs or fast SFF enterprise-class SAS drives in the array head, combined with economical LFF drives staged for archival purposes, all in the same array.

### Vdisks

The Vdisk nomenclature is being replaced by Disk Group. In the Linear Storage and in the SMU V2 you will see reference to Vdisk in Linear Storage and the SMU V3 you will see Disk Group. Vdisk and Disk Group are essentially the same. Vdisks have additional RAID types (RAID 0, 3) not available only in the CLI.

### Disk Group

A Disk Group is a collection of disks in a given redundancy mode (RAID 1, 5, 6, 10, 50). It is equivalent to a Vdisk in Linear Storage and utilizes the same proven fault tolerant technology used by Linear Storage. Disk Group RAID level and size can be created based on performance and/or capacity requirements. With GL200

### Family Information

or newer firmware multiple Disk Groups can be allocated into a Storage Pool for use with the Virtual Storage features.

**LUNs** The MSA 2040 arrays support 512 volumes and up to 512 snapshots in a system. All of these volumes can be mapped to LUNs. Maximum LUN sizes up to 128 TB, the LUNs size are dependent on the storage architecture: Linear vs. Virtualized. Thin Provisioning allows the user to create the LUNs independent of the physical storage.

**Storage Pools** The GL200 firmware or newer introduces Storage Pools – which are comprised of one or more Disk Groups. LUNs are no longer be restricted to a single Vdisk as with Linear Storage. A volume's data on a given LUN can now span all disk drives in a pool. When capacity is added to a system, users will benefit from the performance of all spindles in that pool. Leveraging Storage Pools, the MSA 2040 supports large, flexible Volumes with sizes up to 128TB and facilitates seamless capacity expansion. As volumes are expanded data automatically reflows to balance capacity utilization on all drives.

**RAID 0, 1, 3, 5, 6, 10, 50** In addition to the usual RAID levels, the MSA 2040 features several important additional levels. RAID 6 offers the highest level of RAID protection. It allocates two sets of parity data across drives and allows simultaneous write operations. It can withstand two simultaneous drive failures without downtime or data loss. RAID 10 is mirroring and striping without parity and allows large Disk Groups to be created with high performance and mirroring for fault tolerance. RAID 50 combines the block striping and parity of RAID 5 with the straight block striping of RAID 0, yielding higher performance than RAID 5 through the addition of RAID 0, particularly during writes.

**Performance** The performance figures provided here are for reference as many variables exist between array configurations, workloads, hard drive types, disk group setup parameters and host system setup. All performance information is measured using Linear Storage

HP has traditionally published a set of end-to-end MSA performance specifications which feed into HP Sizer tools which are based on conservative real-world configurations. For consistency, the MSA 2040 performance numbers have been documented in both Benchmark and End-to-End Performance tables. Configuration details are provided for both test scenarios. These numbers are preliminary and subject to change without notice.

#### Benchmark Performance Results:

MSA 2040 Array Performance	HP MSA 2040 Converged SAN Controller with HDD	HP MSA 2040 Converged SAN Controller with SSD
Protocol (host connect)	16 Gb Fibre Channel	16 Gb Fibre Channel
<b>MSA 2040 RAID 10 Performance Results<sup>1</sup></b>		
Random Reads IOPS	52,000	
Random Writes IOPS	25,500	
<b>MSA 2040 RAID 1 SSD Performance Results<sup>2</sup></b>		
Random Reads IOPS		85,000

### Family Information

Random Writes IOPS		32,000
<b>MSA 2040 RAID 5 Performance Results<sup>3</sup></b>		
IO Meter Sequential Reads MB/s <sup>4</sup>	6,310	
IO Meter Sequential Writes MB/s <sup>4</sup>	4,800	

### Benchmark Setup Configurations

- 1). Dual Controller configuration, RAID: 10, block size: 8k, queue depth: 128 per LUN, (192) HDDs, 96 15k HDD + 96 10k HDD, 12 HDDs per vdisk, Win 2008 host: DL380pG8, (4) 16Gb FC direct connect to array
- 2). Dual Controller configuration, RAID: 1, block size: 8k, queue depth: 64 per LUN, (4) Enterprise Mainstream SSDs, 2 SSDs per vdisk, Win 2008 host: DL380pG8, (2) 16Gb FC direct connect to array
- 3). Dual Controller configuration, RAID: 5, block size: 256k, queue depth: 16 per LUN, (72) 10k 300GB HDD, 12 HDDs per vdisk, Win 2008 host: DL380pG8, (4) 16Gb FC direct connect to array
- 4). Sequential numbers are obtained using a single volume per vdisk and single sequential workload generated through the IO Meter performance software

### End-to-End Performance Figures:

Guarantee Performance numbers are a guideline as established by tests using RAW I/O in an Operating System Agnostic test lab environment.

Refer to the paper titled "Upgrading to the HP MSA 2040", available in the Resource Library at: <a href="http://www.hp.com/go/msa2040">www.hp.com/go/msa2040</a> .								

5). For MSA 2040 Hard Disk Drive (HDD) results, 146 GB 15K SAS drives were used in a dual controller configuration of 16 vdisks consisting of twelve disks per vdisk, 1.6 TB volumes, and 4 volumes per host. 4 hosts directly attached to the HP MSA 2040 array were used in this test configuration (results cannot be expected with a single host).

**NOTE:** MSA 2040 tests with 1GbE iSCSI used 8 hosts directly attached to the HP MSA 2040 array.

### Family Information

6). For MSA 2040 Solid State Drives (SSD) results, 200 GB Enterprise Mainstream SSDs were used in a dual controller configuration of 4 vdisks consisting of two disks per vdisk, 200 GB volumes, and 1 volume per host. 4 hosts directly attached to the HP MSA 2040 array were used in this test configuration (results cannot be expected with a single host).

NOTE: MSA 2040 tests with 1GbE iSCSI used 8 hosts directly attached to the HP MSA 2040 array.

7). Sequential tests results were achieved with 256K block sizes and random tests were based on 8K block sizes.

**NOTE:** For sequential workloads with a queue depth greater than 1, each sequential stream is targeted to operate on a separate LBA range. Other types of sequential workloads that target specific LBA ranges may achieve higher results

8). All SAS results were measured using 6Gb SAS Host Bus Adapters.

9). All Fibre Channel results were measured using 16Gb FC Host Bus Adapters. All SAS results were measured using 6Gb SAS Host Bus Adapters. All 10GbE iSCSI results were measured using 10GbE iSCSI Host Bus Adapters. All 1GbE iSCSI results were measured using 1GbE network interface controllers (NICs).

**NOTE:** Number and type of applications, drive type and number of drives, operating system used, and the number of hosts will affect overall performance. This table is provided strictly as a test-lab comparison.

**NOTE:** These numbers reflect a full array configuration with the maximum number of front-end ports, disks, and controllers. The test results shown for the HP MSA 2040 are designed to give a conservative reference point for comparisons.

### Family Information

**DC-power chassis** HP is making the two models of controller-less chassis available with direct current (DC) power supplies. They each have the two empty bays where users can insert one or two MSA 2040 controller(s). The 500 watt power supply is designed to operate over the input range of -40VDC to -75VDC.

#### **MSA 2040 Controller-less Chassis (DC-powered)**

HP MSA 2040 SFF DC-power Chassis C8R11A

(Will accept one or two MSA 2040 SAN or MSA 2040 SAS controllers and can accommodate up to twenty four 2.5-in (SFF) drives)

HP MSA 2040 LFF DC-power Chassis C8R13A

(Will accept one or two MSA 2040 SAN or MSA 2040 SAS controllers and can accommodate up to twelve 3.5-in (LFF) drives)

**Configuration and Management Tools** HP Storage Management Utility (SMU). Management access, out-of-band: WEB GUI, CLI. Interface Types: USB 100/1000 Ethernet. Protocols Supported SNMP, SMI-S, SSL, SSH, SMTP, FTP, HTTP, Telnet

**MSA 2040 Software and Documents Support CD**

- All product documentation (CD can be used on ALL supported server Operating Systems.)
- Host Software Bundles (Win and Linux for both ProLiant x86, ProLiant x64 and Integrity IA64servers)
- CD updated quarterly on HP.com with sustaining firmware updates

**Hot Plug Expansion and Replacement Support** All MSA 2040 models support hot plug expansion and replacement of redundant controllers, enclosures, fans, power supplies, and I/O modules for simple, fast installation and maintenance. Hot add expansion of disk enclosures is also supported.

**Snapshot and Clone** All MSA 2040 arrays come standard with 64 snaps, 512 snaps is available as an option. This controller based functionality offers higher levels of data protection, enables an almost instant recovery from data failure or corruption and offers alternative development testing of 'offline' production data and the ability to backup snapped/cloned data.

<b>Overview</b>	<p>The MSA 2040 arrays come integrated with web browser and CLI based software for storage and RAID management, setup, configuration, and troubleshooting. This reduces the cost of ownership by reducing the training and technical expertise necessary to install and maintain your HP storage solution.</p> <p>The SPOCK database provides interoperability information for thousands of components and millions of component combinations. It is available to all users at <a href="http://www.hp.com/storage/spock">http://www.hp.com/storage/spock</a>.</p>
<b>Server Compatibility</b> <b>NOTE:</b> depends on protocol	<p>Supports most HP ProLiant, BladeSystems and Integrity servers including</p> <ul style="list-style-type: none"> <li>• HP ProLiant DL, ML</li> <li>• HP c-Class Blade Servers</li> <li>• Integrity servers, IA64</li> <li>• Compatibility must be confirmed at: <a href="http://www.hp.com/storage/spock">http://www.hp.com/storage/spock</a></li> </ul>
<b>Industry Standard servers support</b>	<ul style="list-style-type: none"> <li>• Supports most multi-vendor industry standard 32-bit Intel and AMD based (x86) servers. 	<p>the TSANet website for details: <a href="http://www.tsanet.com">www.tsanet.com</a></p> <ul style="list-style-type: none"><li>• Non-HP servers will generally be supported if the HP storage stack is used. This includes supported HP branded HBAs and drivers, and supported FC switches.</li></ul>
--	---

### OS Support

**NOTE:** depends on protocol

Refer to the HP support statements for complete current OS version support: <http://www.hp.com/storage/spock>

- Microsoft Windows Server 2012
- Microsoft Windows Server 2008 R2
- VMware
- HP-UX
- Red Hat Linux (32/64)
- SuSE SLES (32/64)

### Optional Software

#### MSA Performance Tiering

Disk tiers are comprised of aggregating 1 or more Disk Groups of similar physical disks. The MSA 2040 supports 3 distinct tiers:

1. A Performance tier with SSDs
2. A Standard SAS tier with Enterprise SAS HDDs
3. An Archive tier utilizing Midline SAS HDDs.

Prior to GL200 firmware the MSA 2040 operated through manual Tiering, LUN-level tiers are manually created and managed by using dedicated vdisks and volumes. LUN level Tiering requires careful planning such that applications requiring the highest performance be placed on Vdisks utilizing high performance SSD's. Applications with lower performance requirements can be placed on Vdisks comprised of Enterprise SAS or midline SAS HDDs. Beginning with GL200 or newer firmware, the MSA 2040 now supports sub-LUN tiering and automated data movement between tiers.

The MSA 2040 automated tiering engine moves data between available tiers based on the access characteristics of that data. Frequently accessed "pages" will migrate to the highest available tier delivering maximum I/O's to the application (Performance Tiering). Another feature to the MSA 2040 tiering engine is Archive Tiering where "cold" or not frequently accessed data can be moved to lower performance tiers. Pages are migrated between tiers automatically such that I/O's are optimized in real-time.

The Archive Tiering functionality is provided at no charge on the MSA 2040 platform beginning with GL200 or newer firmware. The Performance Tiering capability utilizing a fault tolerant SSD Disk Group is a paid feature and requires the below SKU to enable it. Performance Tiering from SAS MDL (Archive Tier) to Enterprise SAS(Standard Tier) drives is provided at no charge.

#### VMware Site Recovery Manager(SRM)

##### VMware Site Recovery Manager (SRM)

VMware vCenter Site Recovery Manager (SRM) is an extension to VMware vCenter that delivers business-continuity and disaster-recovery solution that helps you plan, test, and execute the recovery of vCenter virtual machines. SRM can discover and manage replicated datastores, and automate migration of inventory from one vCenter to another. Site Recovery Manager integrates with the underlying replication product through a Storage Replication Adapter (SRA). The SRM is available only for linear storage.

##### HP MSA 2040 Site Recovery Adapter (SRA)

The MSA 2040 SRA, a free-to-use plugin, is the program that integrates the VMware vCenter SRM with HP MSA 2040 arrays. It enables full-

### Optional Software

for implementing and testing the disaster recovery between sites located across geographies. It enables communication between the HP MSA Remote Snap replication functionality that is embedded in HP MSA 2040 systems. Users are required to acquire Remote Snap license for their local and remote HP MSA 2040 arrays to use the HP MSA SRA.

Site Recovery Manager Requirements/Dependencies:

- Requires vSphere 5.1, 5.5
- Supports SRM 5.1, 5.5 and 5.8
- Requires HP MSA 2040 /P2000 SRA 5.8 or later Plug-in (downloadable from Hp.com)
- SRM works with Remote Snap linear mode
- Requires purchase of MSA 2040 Remote Snap licenses (one for each site)

#### **HP OneView for VMware vCenter**

##### **HP OneView for VMware vCenter**

HP OneView for VMware vCenter is a component within the HP OneView plug-in for vCenter. It provides VMware administrators that are using VMware's vSphere management console (vCenter) with the ability to see how virtual machines are mapped to datastores and individual MSA 2040 volumes. By providing these clear relationships between VM's, datastores and storage, the VMware administrator's productivity increases, as does the ability to ensure quality of service. Roles for administrators can be defined on an individual basis, providing the ability to apply specific permissions for both view and control functions.

HP OneView for VMware vCenter supports mixed array environments including MSA 2040, 1040, P2000, EVA, P4000, and the XP array series including the P9500.

When deployed with the MSA 2040 array, HP OneView provides the following:

- Active Management functionality for the MSA 2040 array:
  - Create/Expand/Delete a Datastore
  - Create a Virtual Machine from a template
  - VMClone for linear storage
- Monitors the health and status of the MSA 2040
- Displays LUN / volume connections from VMs and ESX servers to the arrays and provides the location and attributes of the MSA 2040 within the SAN
- Identifies what storage features are available to allow administrators to match the features available on the MSA 2040 to their requirements
- Provide a cluster-level view of the storage

HP OneView for VMware vCenter is downloadable from Software Depot:

<https://h20392.www2.hp.com/portal/swdepot/displayProductInfo.do?productNumber=HPVPR>

For more information on HP OneView for VMware vCenter visit: [www.hp.com/go/vmware](http://www.hp.com/go/vmware)

#### **HP StoreFront Manager for Microsoft**

**HP StoreFront Manager for Microsoft** enables management and monitoring of HP MSA Storage running in Microsoft Hyper-V environment with a single pane-of-glass view to events/alerts, capacity and health dashboards and detailed virtual infrastructure information. It integrates seamlessly with Microsoft System Center Operations Manager (SCOM) and provides Microsoft administrators the following:

### Optional Software

It supports heterogeneous HP Storage environment including MSA 2040, 1040, HP StoreVirtual, HP 3PAR StoreServ, HP StoreOnce, HP StoreEasy, HP XP, HP EVA and HP StoreEver Storage.

When deployed with the MSA 2040 array, HP StoreFront Manager provides the following:

- Monitors the health, events and alerts for the MSA 2040/1040 – Linear and virtual Pools, and volumes
- Provides detailed information on the VMs provisioned through MSA Storage
- Effortless installation and configuration using Powershell

HP StoreFront Manager for Microsoft for MSA Storage is downloadable from Software Depot:

[https://h20392.www2.hp.com/portal/swdepot/displayProductInfo.do?productNumber=System\\_Center](https://h20392.www2.hp.com/portal/swdepot/displayProductInfo.do?productNumber=System_Center)

#### **vStorage API for Array Integration (VAAI)**

The vStorage API for Array Integration (VAAI) is one of the storage application programming interface (API) sets in vSphere. VAAI is an API storage partners can leverage to enhance performance of virtual machine (VM) management operations by delegating these operations to the storage array. With hardware offload, ESX/ESXi hosts perform certain operations faster and consume less server CPU and memory resources, and also storage port and storage fabric bandwidth. VAAI includes high performance and scalable VM data path primitives.

#### **Storage Hardware Primitives for VAAI**

- Full Copy or Hardware Assisted Move
- Block Zeroing or Hardware Assisted Zeroing
- Hardware Assisted Locking or Atomic Test and Set (ATS)
- UNMAP reclaims space that is no longer on a thinly provisioned VMFS volume

#### **Snapshot and Volume Copy Software for the MSA 2040**

#### **Product Features Data Protection**

- Snapshots create up to 512 point-in-time pictures of data
- Volume Copies create up to 128 point-in-time copies of data
- Recovery is instant - revert data from any previous Snapshot or Volume Copy (only available on linear storage).
- Backup 'snapped' data to disk, virtual tape, or physical tape without a backup window
- A 64 snapshot license and Volume Copy are included with all MSA 2040 models.
- Support and updates are desired for bundled software functionalities (such as 64 LTU Snap and/or Volume Copy etc. in the MSA 2040 products) a combination HW + SW support care pack must be purchased.
- HP does not provide warranty assistance for software products included with our base hardware products. This would either be SupportPlus or SupportPlus24. The hardware warranty component of these services is accounted for in the pricing of the SP and SP24 care packs.

#### **Data Testing**

- Snap or clone data to test the performance of a software application on 'offline' production data
- Snap or clone data to test how a software patch or enhancement will function on 'offline' production data

### Optional Software

#### MSA 2040 Snapshot and Clone:

All MSA 2040 models come STANDARD with 64 snapshots and Volume Copy software (only available on linear storage).

512 Snapshot option is also available for additional cost.

HP MSA 512-Snapshot Software LTU

TC462A

HP MSA 512-Snapshot Software E-LTU

TC462AAE

#### HP MSA Remote Snap Software

- HP MSA Remote Snap Software is only available with Linear Storage
- HP MSA Remote Snap Software is array based software that provides remote replication on the HP MSA 2040 Array products. HP Remote Snap is a form of asynchronous replication which consists of replication of block-level data from a volume on a local system to a volume that may be on the same system or on a second independent system. This second system may be co-located with the first system or may be located at a remote site.
- HP Remote Snap functionality is based on existing Snapshot technology offered by HP MSA SAN Array products. Snapshots are used to track the data to be replicated as well as to determine the differences in data updated on the master volume, minimizing the amount of data to be transferred.
- HP Remote Snap replication technology provides the ability to accomplish key data management and protection capabilities. First, because Remote Snap uses snapshots as the underlying technology it creates multiple local recovery points which can be used for such tasks as to complement daily backups; second, replication provides the ability to access data in a remote site which could be used for dispersed operations; and third but definitely not least important replication allows for business continuance in the event of a failure on the primary site.
- In order to perform a replication, a snapshot of the volume to be replicated is taken, creating a point-in-time image of the data. This point-in-time image is then replicated to the destination volume by copying the data represented by the snapshot via a transport medium such as TCP/IP (iSCSI) or Fibre Channel. The amount of data transferred is minimized through the use of snapshots whenever possible.

HP MSA Remote Snap Software LTU

TC463A

HP MSA Remote Snap Software E-LTU

TC463AAE

**(NOTE: One license per array is required for replication. For example, if you have two MSA arrays performing replication (from Primary system to Remote System), you will need 2 licenses).**

#### Product Features

- Storage based asynchronous snapshot replication
- Initial copy of data can be performed locally, reducing burden on wide area networks
- Support of both Ethernet and Fiber Channel interconnects provides flexible options to the application environments. Remote Snap is not supported on SAS models.
- Snapshot based replication technology means only changed data will be replicated to alternate site
- Many to 1 replication (up to 4 nodes) - primary use case is to replicate from "many" branch offices to the

### Optional Software

- home office for the purpose of backing up data from the branches
- Single controller to single controller replication
- Advanced scheduler provides several options to IT administrators for business continuance
- Flexible architecture allows remote replication between MSA 2040 and/or P2000 G3 supported arrays. Protects existing investments and enhances business continuity planning objectives.
- Replication Wizard simplifies the task of setting up and establishing replication pairs from one unified, easy to use GUI.
- Snapshot based replication enables both local and remote recovery depending on the need. Snapshot replication isolates problems to a specific point in time which can be selected by the administrator. Additionally snapshot replication supports longer distance replication.
- Multiple relationships provide greater storage flexibility and utilization.
- Bundled 64 Snapshots and Volume Copy integration provides better efficiencies by combining the management and array technologies to create local copies.
- Fast application recovery with minimal or no transaction loss
- Creation of disaster tolerant copies of your critical business data
- No-single-point-of-failure solution to increase the availability of your customers data

Use Case - Scenario 1B  
"Pe

### Customer Benefits

#### Disaster Recovery

Replication technology has typically been used to address disaster recovery issues. Disaster recovery is still the driving business case behind replication. Remote replication can be implemented from the production site to one or more remote sites across a campus, across town, across a state or across the country. When a disaster strikes the primary location, the applications can be brought up at the remote site and continue processing against the replicated copies. When the primary site is back online, the replication can be reversed and when the data is resynchronized, processing can be switched back to the primary site and business can continue. In the past, if an e-mail system

### Optional Software

experienced a disaster it was an "oh well" moment. The loss of a day or more of e-mail was not considered important. Today, e-mail is a critical component of many companies' business plans and recovering e-mail after a disaster quickly and completely is required.

#### **Maintenance**

HP Remote Snap software can also be used to solve other business needs. For instance, E-mail servers may need periodic maintenance that can take hours to complete. With remote replication in place, the downtime can be minimal (as long as it takes to bring the remote peer of the primary e-mail server online). The primary server can be worked on (patches, hardware upgrades, etc.) and then brought back online and into production. A whole datacenter can be failed over to a remote site on purpose to perform maintenance on generators, air conditioning, etc. Replication can also be used to perform a datacenter move with minimal downtime (fail everything to the DR site, move the production datacenter to its new location then fail the DR site back to the new datacenter).

#### **Storage Based**

Data replication is performed at the storage subsystem controller level and is totally transparent to the host, alleviating unnecessary host cycles to perform the data mirroring functions. Unlike a fabric based or host based solution, the storage based solution dedicates its resources to managing the replication process between arrays, with minimal impact to applications, other data or devices on the SAN.

#### **Bi-Directional**

The bidirectional HP MSA 2040 Array solution addresses the growing need among businesses to ensure continuous availability of applications that are critical to daily business operations. HP MSA 2040 enables two sites in a remote replication connection to use each other as a destination to maintain replicated copies of online data. This maximizes resource utilization while enabling business continuance, even in the event of disaster.

#### **Disaster Tolerance**

The MSA 2040 Arrays utilize snapshot data online and in real time to a remote MSA 2040 through a local or extended storage area network (SAN). Additionally, data replication can be bidirectional, meaning that a storage array can be both a source and a destination. A particular LUN can be replicated in only one direction between the two storage arrays. Write I/O data sent to the source is replicated by HP MSA 2040 Array to the destination. A pair of properly configured HP MSA 2040 arrays is a replication solution that guarantees data integrity in the event of a storage system or site failure.

#### **First initial copy**

When a DR site is initially created an initial copy of the data from the source volume to the target volume must occur. The MSA 2040 array allows this first copy to take place locally. After completion the disks can be manually moved to the remote location. Subsequent changes will only remotely copy the changed blocks.

#### **SAN Extensions**

HP MSA 2040 Array provides the capability to replicate data over direct Fibre Channel. The distances supported over dark fiber are determined by the speed of the dark fiber connection and the technology used to communicate over the dark fiber.

#### **Path failover (MPIO)**

Multipath failover (MPIO) is supported on all operating systems

#### **HP StoreEasy 3000 Gateway Storage**

#### **Add more value to your MSA 2040 array**

HP MSA combined with HP StoreEasy 3840 Gateway Storage enables you to consolidate block and file

### Optional Software

storage onto a single, high-performance system - giving your business the flexibility to meet changing business needs on-demand.

The HP StoreEasy 3840 delivers efficient, secure, and highly available file services that help address your changing file-serving needs. It reduces your cost of ownership by simplifying management, increasing resource utilization, centralizing growth, and protecting data. HP StoreEasy 3840 provides a simple and consistent experience for managing block and file storage for multiple workloads centrally.

### Service and Support, HP Care Pack, and Warranty Information

#### Warranty

Three-year limited warranty, parts exchange Next Business day delivery

Enclosures, Hard drives, and Options for the MSA 2040 carry their own warranty. Refer to HP's Limited Warranty Statement for more information.

The MSA 2040 has been designed with customer self-repairable parts to minimize repair time and provide greater flexibility in performing defective parts replacement. Please refer to HP's limited warranty Statement and parts replacement instructions for further details.

<http://h18006.www1.hp.com/products/storageworks/warranty.html>

Products included in various kits carry their own individual warranties.

**NOTE:** The warranty of the hard drive options purchased with the MSA 2040 models is different for SAS hard drives versus SAS MDL. SAS hard drive options have a three year warranty and SAS MDL have a one year warranty.

#### Solid State Drives (SSD) Warranty

3/0/0 warranty; Customer Self Repair (CSR) subject to maximum usage and or maximum supported lifetime limitations, whichever occurs first. Maximum Supported Lifetime is the period in years set to equal the warranty for the device. Maximum usage limit is the maximum amount of data that can be written to the device before reaching the device's write endurance limit.

#### Service and Support

##### Services to accelerate time to results

HP Storage Services bring you a rich portfolio of consulting and support services designed to add value to our core storage products and solutions. We have the know-how and experience to put storage technology to work for you. We work closely with you as your strategic partner, leveraging our full services portfolio to make sure that everything works to optimize your enterprise.

Choose from services aligned to our storage product offerings and lifecycle. From mission-critical onsite services to innovative web-based remote support, you choose the precise level of attention and support your business demands.

#### Discover, plan, and design

**Choose from a rich portfolio of services to make the most of MSA 2040 SAN Storage so you can efficiently and affordably consolidate, manage, and extract value from unstructured data.**

**HP Services can help you discover needs and create a plan for simplifying the environment, reducing risk, and maximizing your storage investments**

**HP Storage Efficiency Analysis** - The HP Storage Efficiency Analysis provides customers with a view of their storage infrastructure and operating environment; highlighting recommendations for improvements. The report provides extensive insight about the existing storage environment, opportunities for efficiency gains, asset aging and replacement through interaction with key decision makers

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-6727ENW.pdf>

**HP Storage Impact Analysis (SIA):** The HP Storage Impact Analysis service provides a 2-4 week

### Service and Support, HP Care Pack, and Warranty Information

discovery engagement with executive summary presentation. The goal of this service is to help provide customers guidance on storage related issues and develop remediation plans.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-1174ENW.pdf>

**HP Storage Cloud Design Service** - Build a scalable, low-cost enterprise storage environment with inherent cloud benefits to meet big data needs.

**HP Storage Modernization Service:** The HP Storage Modernization service is a 4-6 week service that defines the customers envisioned target storage environment based on a proven solution design methodology. HP architects will quickly perform tool-assisted automatic discovery and facilitate a two-day strategy workshop with all key stakeholders involved in the storage infrastructure initiative

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-4620ENW.pdf>

---

#### Deploy and integrate

We can help you configure, set up, and efficiently use MSA 2040 SAN Storage as well as help migrate data, improve capacity utilization, and establish information management standards used across backup, replication, and archiving needs.

**HP MSA Family Disk Array Installation and Startup Service** - Implement right from the start, as HP experts install, test, and configure your hardware and software onsite. We deliver a tailored storage deployment properly integrated into your environment.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA0-3048ENW.pdf>

**HP Storage Data Migration Services** - End-to-end data migration service providing seamless discovery, assessment, planning, and design, completely customizable to your organization's storage area network or network attached storage environment and using innovative software to help you migrate to HP storage quickly and efficiently.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-0774ENW.pdf>

**HP Storage and Data Residency Service** - Strategic augmentation of your current environment with HP resources who become your trusted advisor to provide answers that are right for your storage and backup environment. <http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-9481ENW.pdf>

**HP Proactive Select** - A flexible way to purchase services to fit your environment with an extensive menu of HP Proactive Select event and technical services, such as onsite firmware upgrades, health checks, assessments, and education.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA2-3842ENW.pdf>

---

#### Operate and support

**Choose the right support to maximize uptime, free up your resources, and achieve improved value - as you get the most out of the existing IT assets while accelerating time-to-revenue.**

**HP Proactive Care 24x7** - Hardware and software support services designed specifically for your technology with rapid access to Advanced Solution Center Specialists plus firmware and software management and best practice advice

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>

**HP Proactive Care Advanced** - Building on HP Proactive Care to give you personalized technical and operational advice from an assigned local Account Support Manager for personalized technical collaboration, flexible access to specialist skills to help fine-tune business critical IT, and Enhanced

### Service and Support, HP Care Pack, and Warranty Information

Critical Incident Management to help make sure your business is not affected if you experience a system or device outage.

<http://h20195.www2.hp.com/V2/GetDocument.aspx?docname=4AA3-8855ENW&cc=us&lc=en>

**HP Proactive Care Personalized Support** - An option-if you have HP Proactive Care- to bring increased personalization of the Proactive Care support experience through the assignment of an Account Service Manager (ASM) who provides IT best practice advice to help address IT issues and projects.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA4-3446ENW.pdf>

**HP Foundation Care 24x7 Service** - HP Foundation Care 24x7 connects you to HP 24 hours a day, seven days a week for assistance on resolving issues - hardware onsite response within four hours and software call back within two hours after opening your case. Three years' coverage recommended with HP Care Pack Service.

**HP Education Services** - Comprehensive training for new, as well as experienced, storage administrators designed to expand your skills and keep you up to speed with the latest storage and virtualization technology from HP Storage. <http://education.hp.com/curr-storsan.htm>

**Optimized Care-** delivers best performance and stability through deployment and proactive management practices

**Choose from three levels of operate and support care**

**HP 6hr CTR Proactive Care Service**

**Additional options** - HP Proactive Care Personalized Support (once per Proactive Care support new environment), an additional day of HP Personalized Support, and 10 additional HP Proactive Select credits per year, per array

**Standard Care-** maintains high level of uptime, along with expert help to cut the cost and complexity of implementation and support

**HP Proactive Care 24x7**

**Additional options** - HP Proactive Care Personalized Support (once per Proactive Care support new environment), an additional day of HP Personalized Support, and 10 additional HP Proactive Select credits per year, per array

**Basic Care-** Minimum recommended support

**HP Foundation Care 24x7**

**Additional options** - 10 Proactive Select Credits per Year

**Remote Support Automation**

HP Automation provides 24x7 coverage, proactive problem prevention, accurate problem diagnosis and faster problem resolution, as well as interactive support portals and tools. This is an integral, and cost-free, part of your HP support relationship and we are continually investing in additional cutting-edge capabilities to make it better.

To learn more on HP Storage Services, please contact your HP sales representative or HP Authorized Channel Partner

HP Care Pack Services are sold by HP and HP Authorized Service Partners:

- Services for customers purchasing from HP or an enterprise reseller are quoted using HP order configuration tools.

### Service and Support, HP Care Pack, and Warranty Information

- Customers purchasing from a commercial reseller can find HP Care Pack Services at [www.hp.com/go/lookuptool](http://www.hp.com/go/lookuptool)

Configuration Information

Configure to Order Program Information

HP has a very successful Configure to Order program for the MSA 2040 family. The MSA 2040 models and options may or may not be factory installed in a rack with add-on controllers, switches, MSA 2040 disk enclosures and hard drives. The MSA 2040 arrays may be integrated with ProLiant servers or as standalone storage. Orders to be shipped through the CTO process must have a minimum of two drives of the same type (SSD, SAS or SAS MDL) ordered per controller.

Step 1 - MSA 2040 - Base Configuration

Select one chassis:

Model Name	SKUs
<b>MSA 2040 Controller-less Chassis (AC-powered)</b>	
HP MSA 2040 SFF Chassis <sup>16</sup>	C8R10A
HP MSA 2040 LFF Chassis <sup>17</sup>	C8R12A
<b>MSA 2040 Controller-less Chassis (DC-powered)</b>	
HP MSA 2040 SFF DC-power Chassis <sup>17</sup>	C8R11A
HP MSA 2040 LFF DC-power Chassis <sup>18</sup>	C8R13A

### Configuration Information

HP MSA 2040 16Gb Short Wave Fibre Channel SFP+ 4-Pack Transceiver (Includes four x 16Gb SW FC SFPs)	C8R24A
HP MSA 2040 10Gb Short Range iSCSI Channel SFP+ 4-Pack Transceiver (Includes four x 10Gb SW iSCSI SFPs)	C8R25A
HP MSA 2040 1Gb RJ-45 iSCSI Channel SFP+ 4-Pack Transceiver (Includes four x 1Gb RJ-45iSCSI SFPs)	C8S75A

### Step 2c - SSD, SAS, SED or SAS MDL Drive Options

**NOTE:** SAS MDL drives are designed for archival or reference data. They should not be used in a heavy or intense I/O environment. Those situations require the use of enterprise-class SSD or SAS drives. MSA 3.5-inch or 2.5-inch drives are for use only with MSA arrays.

Customers can mix SSD, SAS, and SAS MDL drives in the same array head and disk enclosure.

#### MSA 2040 Drives:

##### Solid State Drives (SSDs) (SFF 2.5-inch)

###### 12G SFF SAS SSDs

HP MSA 200GB 12G ME SAS SFF (2.5in) Enterprise Mainstream 3yr Warranty Solid State Drive	K2Q45A
HP MSA 400GB 12G ME SAS SFF (2.5in) Enterprise Mainstream 3yr Warranty Solid State Drive	J9F37A
HP MSA 800GB 12G ME SAS SFF (2.5in) Enterprise Mainstream 3yr Warranty Solid State Drive	J9F38A
HP MSA 1.6TB 12G ME SAS SFF (2.5in) Enterprise Mainstream 3yr Warranty Solid State Drive	J9F39A

###### 6G SFF SAS SSDs

HP MSA 200GB 6G ME SAS 2.5in Enterprise Mainstream 3yr Warranty Solid State Drive	C8R19A
HP MSA 400GB 6G ME SAS 2.5in Enterprise Mainstream 3yr Warranty Solid State Drive	C8R20A
HP MSA 800GB 6G ME SAS 2.5in Enterprise Mainstream 3yr Warranty Solid State Drive	C8R21A

##### SAS Drives (SFF 2.5-inch)

###### 12G SFF 15K SAS HDDs

HP MSA 300GB 12G SAS 15K SFF (2.5in) Enterprise 3yr Warranty Hard Drive	J9F40A
HP MSA 450GB 12G SAS 15K SFF (2.5in) Enterprise 3yr Warranty Hard Drive	J9F41A
HP MSA 600GB 12G SAS 15K SFF (2.5in) Enterprise 3yr Warranty Hard Drive	J9F42A

###### 6G SFF 15K SAS HDDs

HP MSA 146GB 6G SAS 15K 2.5-inch Dual Port Enterprise 3yr Warranty Hard Drive	E2D54A
HP MSA 300GB 6G SAS 15K 2.5-inch Dual Port Enterprise 3yr Warranty Hard Drive	C8S61A

###### 12G SFF 10K SAS HDDs

HP MSA 300GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive	J9F44A
HP MSA 600GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive	J9F46A
HP MSA 900GB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive	J9F47A
HP MSA 1.2TB 12G SAS 10K 2.5in Dual Port Enterprise 3yr Warranty Hard Drive	J9F48A
HP MSA 1.8TB 12G SAS 10K SFF (2.5in) 512e Enterprise 3yr Warranty Hard Drive	J9F49A

**NOTE:** 512e drives require MSA 1040/2040 firmware version GL200P002 or newer

###### 6G SFF 10K SAS HDDs

HP MSA 300GB 6G SAS 10K 2.5-inch Dual Port Enterprise 3yr Warranty Hard Drive	E2D55A
HP MSA 450GB 6G SAS 10K 2.5-inch Dual Port Enterprise 3yr Warranty Hard Drive	E2D56A
HP MSA 600GB 6G SAS 10K 2.5-inch Dual Port Enterprise 3yr Warranty Hard Drive	C8S58A

### Configuration Information

HP MSA 900GB 6G SAS 10K 2.5-inch Dual Port Enterprise 3yr Warranty Hard Drive C8S59A

HP MSA 1.2TB 6G SAS 10K SFF(2.5-inch) Dual Port Ent 3yr Warranty Hard Drive E7W47A

#### **12G SFF 7.2K SAS MDL HDDs**

HP MSA 1TB 12G SAS 7.2K SFF (2.5in) 512e Midline 1yr Warranty Hard Drive J9F50A

HP MSA 2TB 12G SAS 7.2K SFF (2.5in) 512e Midline 1yr Warranty Hard Drive J9F51A

**NOTE: 512e drives require MSA 1040/2040 firmware version GL200P002 or newer**

#### **6G SFF 7.2K SAS MDL HDDs**

HP MSA 1TB 6G SAS 7.2K 2.5-inch Dual Port Midline 1yr Warranty Hard Drive C8S62A

### **MSA Large Form Factor (LFF) SAS MDL DP drives for MSA 2040 Array and MSA 2040 3.5-inch Disk Enclosure**

#### **12G LFF 7.2K SAS Midline Drives**

HP MSA 8TB 12G SAS 7.2K LFF (3.5in) 512e Midline 1yr Warranty Hard Drive M0S90A

HP MSA 6TB 12G SAS 7.2K LFF (3.5in) 512e Midline 1yr Warranty Hard Drive J9F43A

HP MSA 4TB 12G SAS 7.2K LFF (3.5in) 512e Midline 1yr Warranty Hard Drive K2Q2A

**NOTE: 512e drives require MSA 1040/2040 firmware version GL200P002 or newer**

#### **6G LFF 7.2K SAS Midline Drives**

HP P2000 1TB 6G SAS 7.2K LFF (3.5-inch) Dual Port MDL Hard Drive AP861A

HP P2000 2TB 6G SAS 7.2K LFF (3.5-inch) Dual Port MDL Hard Drive AW555A

HP MSA 2TB 6G SAS 7.2K LFF(3.5in) Midline Self Encrypted 1yr Wty Hard Drive C8R22A

HP MSA 6TB 6G SAS 7.2K rpm LFF (3.5-inch) Midline 1yr Warranty Hard Drive J9F36A

### Configuration Information

#### MSA Large Form Factor (LFF) SAS DP drives for MSA 2040 Array and MSA 2040 3.5-inch Disk Enclosure

##### 12G LFF 15K SAS HDDs (SFF Drives in LFF Converters)

HP MSA 300GB 12G SAS 15K LFF (3.5in) Converter Enterprise 3yr Warranty Hard Drive	J9V68A
HP MSA 450GB 12G SAS 15K LFF (3.5in) Converter Enterprise 3yr Warranty Hard Drive	J9V69A
HP MSA 600GB 12G SAS 15K LFF (3.5in) Converter Enterprise 3yr Warranty Hard Drive	J9V70A

##### 6G LFF 15K SAS HDDs

HP P2000 300GB 6G SAS 15K rpm LFF Dual Port Enterprise Hard Drive	AP858A
HP P2000 450GB 6G SAS 15K rpm LFF Dual Port Enterprise Hard Drive	AP859A
HP P2000 600GB 6G SAS 15K rpm LFF Dual Port Enterprise Hard Drive	AP860A

#### MSA Small Form Factor (SFF) SAS DP Self-Encrypted Drives for MSA 2040 Array and D2700 2.5-inch Disk Enclosure

HP MSA 900GB 6G SAS 10K SFF(2.5in) Enterprise Self Encrypted 3yr Wty Hard Drive	G0M43A
---	--------

#### NOTE:

- All drives within the MSA 240 array must be self-encrypted drives to enable the encryption feature. There cannot be a mixture of encrypted and non-encrypted drives within the same array.
- SEDs can be used in a non-SED environment, but will not be encrypted unless all drives in the array are SED
- Self-encrypted drives are only supported on the MSA 2040 Storage array and requires Firmware version GL105. Customers must upgrade their MSA 2040 controller firmware to GL105 or later for Self-Encrypting Drive functionality
- All MSA SEDs are FIPS 140-2 compliant FIPS 140-2 Validated Self-Encrypting Drives (SEDs) have been certified by the U.S. National Institute of Standards and Technology (NIST) and Canadian Communications Security Establishment (CSE) as meeting the Level 2 security requirements for cryptographic modules as defined in the Federal Information Processing Standards (FIPS) 140-2 Publication

#### NOTE:

- For instructions to setup and use SEDs, refer to the MSA 2040 CLI Reference Guide and MSA 2040 SMU Reference Guide located on the HP MSA 2040 Manuals page: (<http://www.hp.com/support/msa2040/Manuals> for instructions on setup and use of SEDs
- Also, Refer to the HP MSA 1040/2040 Best Practices document at <http://www.hp.com/support/msa2040/BestPractices>

Configuration Information

Step 2d - Drive Enclosure Options

MSA 2040 Dual I/O 3.5-inch 12 Disk Enclosure

Rear Panel components

- |                    |                 |
|--------------------|-----------------|
| 1. Power Indicator | 4. SAS In Port  |
| 2. Fault Indicator | 5. SAS Out Port |
| 3. Unit Locator    |                 |

HP D2700 Disk Enclosure

Rear Panel components

- |                   |                            |
|-------------------|----------------------------|
| 1. Power Supply 1 | 6. Fan 2                   |
| 2. Power Supply 2 | 7. Rear UID push button    |
| 3. Fan 1          | 8. Enclosure LEDs          |
| 4. I/O Module A   | 9. Power on/standby button |
| 5. I/O Module B   |                            |

Use either disk enclosure with Large or Small Form Factor, single or dual controller array heads. Each ships with two .5m mini-SAS to mini-SAS cables.

HP MSA 2040 LFF Disk Enclosure	C8R18A
HP D2700 Disk Enclosure	AJ941A

Step 2e - SAS Cable Options

mini-SAS to mini-SAS Cables:

Connecting MSA 2040 Controller to a JBOD if a longer cable is desired.

HP External Mini SAS 1m Cable ALL	407337-B21
HP External Mini SAS 2m Cable	407339-B21

## Configuration Information

**Step 3 - Other MSA 2040 Options****Choose optional AC Power Cords (2 required)**

**NOTE:** Two PDU cables: one 142263-008 (Black) and one 1422633-013 (Grey), ship standard with all AC-powered enclosures.

HP ProLiant 12 ft Power Cord	227099-001
Power Cord, (Australia/China/New Zealand)	227098-001
Power Cord, (Central Europe)	157215-001
Power Cord, (United Kingdom/Hong Kong)	157216-001
Power Cord, (Switzerland)	157219-001
Power Cord, (Italy)	157217-001
Power Cord, (Denmark)	157218-001
Power Cord, (Japan)	139867-001
Power Cord, (South East Asia/India)	157220-001

**Step 4a - Choose Supported Options For Fibre Channel Infrastructure**

<b>Bus Adapters</b>	
HP Modular Smart Array SC08e 2-ports Ext PCIe x8 SAS Host Bus Adapter	614988-B21
HP H221 PCIe 3.0 SAS Host Bus Adapter	729552-B21
<b>SAS Controllers</b>	
HP Smart Array P712m/256 6Gb 2-ports Int/2-ports Ext Mezzanine SAS Controller	488348-B21
HP Smart Array P711m/1G 6Gb FBWC 4-ports Ext Mezzanine SAS Controller	513778-B21
HP Smart Array P721m/2GB FBWC 6Gb 4-ports Ext Mezzanine SAS Controller	650072-B21
HP Smart Array P721m/512 FBWC 6Gb 4-ports Ext Mezzanine SAS Controller	655636-B21
HP Smart Array P731m/512 FBWC 6Gb 4-ports Ext Mezzanine SAS Controller	698536-B21
HP Smart Array P431/2GB FBWC 12Gb 2-ports Ext SAS Controller	698531-B21
<b>Switches</b>	
HP 6Gb SAS Switch Single Pack for HP BladeSystem c-Class	BK763A
HP 6Gb SAS Switch Dual Pack for HP BladeSystem c-Class	BK764A

### Step 4c - Choose Supported Options For 10GbE Infrastructure

- verify that the cable/transceiver is supported with the connecting device (i.e. switch or NIC/iSCSI HBA)

For detailed information on NICs and OS initiator please go to:

Configuration Information

Step 6 – Services (Software Support)

MSA 2040 Advanced Virtualization Functionality	<p>The MSA advanced virtualization functionalities are available for new and existing MSA 2040 owners via firmware upgrade. (Thin Provisioning, SSD Read Cache, Automated Tiering: Archive and Performance**, Redirect on Write Snapshots and Wide Striping).</p> <p><b>**NOTE:</b> The Performance Automated Tiering is a paid option for the MSA 2040.</p>	
	HP MSA 2040 Perf Auto Tiering LTU	D4T79A
	HP MSA 2040 Perf Auto Tiering E-LTU	D4T79AAE
	HP MSA 512-Snapshot Software LTU	TC462A
	HP MSA 512-Snapshot Software E-LTU	TC462AAE
	HP MSA Remote Snap Software LTU	TC463A
	HP MSA Remote Snap Software E-LTU	TC463AAE

### Technical Specifications

<b>MSA 2040</b>	<b>POWER REQUIREMENTS</b>	
	Input Power Requirements (typical-running I/O) SFF/LFF arrays	<ul style="list-style-type: none"> <li>110VAC 3.32A, 344-390 W; 220VAC 1.61A, 374-432W</li> </ul>
	Max Input Power	100-240 VAC, 50/60 Hz., 4.5-1.9A; 48-60 VDC 10.4A/8.3A
	Heat Dissipation	1622 BTU/hr
	<b>TEMPERATURE AND HUMIDITY RANGES</b>	
	Operating Temperature	41°F to 104°F (5°C to 40°C)
	Shipping Temperature	-40°F to 158°F (-40°C to 70°C)
	Operating Humidity	10% to 90% RH @ 104°F (40°C) non-condensing
	Non-Operating Humidity	Up to 93% RH @ 104°F (40°C)
	<b>DECLARED ACOUSTIC NOISE LEVELS</b>	
	Sound Power	A weighted sound power LWAd=6,75 B
	Sound Pressure	A weighted sound pressure LpAm - 55dB
	<b>SHOCK AND VIBRATION</b>	
	Shock, Operational	3G's for 11 milliseconds
	Shock, Non-Operational	15G 11ms half sine
	Vibration, Operational	5-500Hz, 0.14 Grms shaped
	Vibration, Non-Operational	3-365-3Hz, 1.22 Grms,z-axis,0.85 Grms, X&Y axis shaped spectrum
	<b>PHYSICAL</b>	
	Height	3.5 in/ 8.9 cm
	Depth (excluding cables) (back of ear to back of controller handle)	MSA 2040 SFF 24-bay array: 19.5 in / 49.5 cm MSA 2040 LFF 12-bay array: 22.5in. / 57.2 cm
	Width (body only)	17.6 in / 44.7 cm (w/ ears 19 in / 48.26 cm)
	Chassis Weight (no controllers)	MSA 2040 LFF chassis: 31 lbs. (DC-pwr model: 32.6 lbs) MSA 2040 SFF chassis: 29.1 lbs (DC-pwr model: 30.7lbs)

<b>MSA 2040 Controllers:</b>	<b>User Interface</b>	Status and activity provided via management interfaces. Status Indicators on front of Controller
	<b>RAID Support</b>	0, 1, 3, 5, 6, 10, 50
	<b>Cache Memory</b>	4GB Read/Write. ECC protection with backup to Flash memory (indefinite backup)
	<b>Cache Backup</b>	ECC protection with back up to flash memory (indefinite backup)
	<b>Upgradeable Firmware</b>	yes
	<b>Disk Drive and Enclosure Protocol Support</b>	6 Gb SAS - Serial Attached SCSI
	<b>Host Ports</b>	FC: 4 x 8Gb Fibre Channel (per controller) FC: 4 x 16Gb Fibre Channel (per controller)

## Technical Specifications

		iSCSI: 4 x 10GbE iSCSI (per controller)
		iSCSI: 4 x 1GbE iSCSI (per controller)
		SAS: 4 x 12 Gb mini-SAS HD using SAS 3.0 SFF-8644 connect interface (per controller)
	Expansion Port	SAS (SFF8088) 4x lane 6 Gb SAS
	Weight, controller	MSA 2040 SAN Controllers 4.8 lbs.

### MSA 2040

### Regulatory Info

### Summary of Changes

Date	Version History	Action	Description of Change:
03-Apr-2015	From Version 11 to 12	Changed	Changes made to the What's New, Models, Family Info, Optional SW and Config Info. Sections.
30-Mar-2015	From Version 10 to 11	Changed	SKUs descriptions were updated, Obsolete SKU were removed.
		Added	Support for 12G SFF and LFF w Hard Disk Drives
12-Dec-2014	From version 9 to 10	Changed	Added the Configuration Table for mixing SFPs. on the Features Section
01-Dec-2014	From Version 8 to 9	Changed	Changes made throughout the QuickSpecs.
29-Sep-2014	From Version 7 to 8	Changed	Changes made throughout the QuickSpecs.
02-May-2014	From Version 6 to 7	Changed	Operate and Support and Basic Care were revised.
25-Apr-2014	From Version 5 to 6	Changed	Models and mini-SAS cables were revised.
31-Mar-2014	From Version 4 to 5	Changed	Hard Drives were revised.
09-Dec-2013	From Version 3 to 4	Changed	<p>Changes made to the What's New section:</p> <p>Introducing a new 1.2 TB SFF 10K Enterprise Hard Drive (E7W47A)</p> <p>Adding two new MSA 2040 bundles using the new 1.2 TB SFF SAS Hard Drive</p> <p>C8R16A - HP MSA 2040 SAN Dual Controller 24x1.2TB SAS 10K SFF HDD 28.8TB Bundle</p> <p>C8S56A - HP MSA 2040 SAS Dual Controller 24x1.2TB SAS 10K SFF HDD 28.8TB Bundle</p>
30-Sep-2013	From Version 2 to 3	Changed	<p>Changes made throughout the entire QuickSpec.</p> <p>Changed What's New in the MSA 2000 array family to:</p> <p>Adding 12Gb SAS Models -support up to Four 6Gb/12Gb SAS connections per controller.</p> <p>Adding support for 1GbE/10GbE iSCSI to MSA 2040 SAN Controller.</p>

### Summary of Changes

			<p>NOTE: Customers must upgrade their MSA 2040 controller firmware to GL101 or later for iSCSI functionality.</p> <p>Adding support for HP MSA 2040 SAN Controller to offer a combination of host interface protocols by mixing FC and iSCSI SFPs on the same controller. Please refer to the valid Configuration Table for Mixing SFPs in this doc.</p> <p>Adding support for new 1.2 TB SFF SAS and 4TB LFF SAS Midline drive.</p>
21-Aug-2013	From Version 1 to 2	Changed	Changes made in the Family Information and Configuration Information sections.
