

DisplayPort to DVI Active Adapter

StarTech ID: DP2DVIS

The DP2DVIS DisplayPort to DVI Active Single Link adapter lets you connect your DisplayPort video source (desktop PC, laptop, etc.) to a DVI-D monitor, projector or display, including televisions and Apple Cinema Display HD, eliminating the expense of having to upgrade to a DisplayPort-capable monitor.

Unlike passive adapters, this DP to DVI converter offers an active conversion for use with any DisplayPort output - ideal for graphics cards that are not capable of outputting multi-mode DP++ signals (e.g. ATI Eyefinity). Supporting resolutions up to 1920x1200, this compact device provides a simple solution for converting DisplayPort output for compatibility with existing DVI monitors, televisions or projectors.

Backed by a StarTech.com 2-year warranty and free lifetime technical support.

Applications

- Ideal for digital entertainment centers, home offices, business conference rooms and trade show displays
- Keep your existing DVI monitor to be used with your new DisplayPort computer or source
- Great for using your DVI monitor as a secondary display
- Perfect for larger format screens that use high DVI resolutions
- Adapt from graphics cards that are not capable of outputting DP++ (multi-mode) signals
