

# Copper Cabling Solutions

## Category 6 FTP 2020 Series High Density Panels

The Connectix 2020 Series Patch Panel is an alternative to The High Density Panel. It offers the same performance as the standard panel but has been designed to present the cable termination IDCs horizontally on a tray at the rear of the panel, making termination and cable management easier. Connectix 24 Way Panels achieve optimum transmission performance by incorporating the highest quality components and innovative on-board compensation techniques. The front of the panel features write on designation labels, which also provide an ideal surface for application of custom printed labels.

This panel offers extended PowerSum characteristics and exceeds the ANSI/TIA-568-C specifications. When combined with Connectix Modules and UTP Cable the link will perform well in excess of the stated Specification. LC, SC, ST and FC fibre modules are also available,
